

# WIC Minimum Stock Requirements

## Effective March 1, 2006

### URBAN COUNTIES

Minimum stock requirements for urban counties are determined by the maximum food quantity in a commonly issued food package. Minimum stock requirements represent two clients served.

### RURAL COUNTIES

Minimum stock requirements for rural counties are determined by the maximum food quantity in a commonly issued food package. Minimum stock requirements represent one client served.

### MINIMUM STOCK CALCULATIONS

Infant formula and infant cereal minimum stock requirements are calculated by using the maximum food type for each formula food package that also included infant cereal. The food packages listed below are associated with each infant formula listed on the Minimum Stock Requirements form. An enhanced breastfeeding woman food package and the default enhanced breastfeeding woman food package are used to calculate minimum stock for the remaining food types. An enhanced breastfeeding woman food packages include additional cheese, beans, juice, canned tuna, and carrots.

### EXEMPTIONS FROM MINIMUM STOCK REQUIREMENTS

Vendors may request exemptions from minimum stock requirements from their local agency. Exemptions may be provided for those items that are not used by WIC clients on a regular basis. Exemptions from minimum stock can be requested for the following items:

- Any infant formula (powder or concentrate)
- Lactose Free Milk (i.e. Dairy Ease, Lactaid)

Approval for exemption from minimum stock is granted by the local agency. A copy of the Exemption form must be on file at the vendor's location and at local and state agencies.

### BREAKDOWN OF KANSAS COUNTIES

The Kansas WIC program used the following information from the Kansas Department of Health and Environment, Office of Local and Rural Health, to create county separations for minimum stock. This table provides the original breakdown of counties based on the counties 2000 actual census counts. The original breakdown based on population is as follows:

Frontier	less than 6 persons per square mile
Rural	6-19.9 persons per square mile
Densely-Settled Rural	20-39.9 persons per square mile
Semi-Urban	40-149.9 persons per square mile
Urban	150 or more persons per square mile

To provide an equitable split, the rural county designation combines Frontier and Rural categories and the urban county designation combines Densely-Settled Rural, Semi-Urban, and Urban categories.
